

Small storm slabs on Sourdough Canyon road cuts

Sourdough Canyon

Northern Gallatin

2/14/2023

Code

SS-N-R1-D1

Elevation

6000

Aspect Range

W-NW

Latitude

45.56860

Longitude

-111.00900

Notes

We observed a few small crowns on steeper road cuts in Sourdough today, NW and W aspects. 4-8" at crown, 20-40' wide, ~10' vertical. They looked like storm slabs that had run overnight, maybe on a density change in the storm snow. Debris piles were small and covered with 2-3" of new snow. Low consequence, but maybe enough to surprise a kid or a dog. Photos were taken shortly above the 2 mile marker.
