## Whumpfs and Shooting Cracks in Sunlight Basin

Taylor Fork Southern Madison 2/21/2025 Code Latitude 45.06070 Longitude -111.27200 Notes

While traversing to our pit site in Sunlight Basin, we triggered a whumpfing <u>collapse</u> and a shooting crack up to 100' long across an adjacent slope. This <u>snowpit</u> on a SE <u>aspect</u> was made up of a dense <u>slab</u> of recent snow, sitting on top of many different layers of junky, faceted grains. <u>Propagation</u> was easy to find (ECTP 11, HS: 112).
