

Cornice fall triggered slide in Sunlight Basin

Taylor Fork
Southern Madison
2/25/2025
Code
HS-NC-R2-D2.5
Elevation
9400
Aspect
N
Latitude
44.97060
Longitude
-111.31000
Notes

Another day of warm temps and clear skies allowed us to cover a lot of ground in the Southern Madisons. We rode into the Taylor Fork, up to the weather station, to the top of Carrot Basin, through Sage Basin, up and over into Cabin Creek, and all the way up to the head of Red Canyon.

We spotted a few old avalanches. [One in Cabin Creek](#) that was triggered two days ago by snowmobilers on a N facing [aspect](#). At the top of Carrot Basin, we saw a small avalanche (R1-D1) on a N [aspect](#) that likely broke yesterday on buried weak layers. We also spotted one [cornice](#)-fall triggered (R2-D2) avalanche that broke earlier this week in Sage Basin and then an older [cornice](#) fall triggered [slab](#) in Sunlight Basin.

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Hard slab avalanche
Trigger
Cornice fall
R size
